

Pricing Competition Management

Software for Federations

The Project:

Vertical-Life is the exclusive provider of the Competition Management Software (CMS) for the IFSC from the 2020 season. This software can be purchased by national federations and guarantees a professional execution of national, regional and local competitions.

The CMS includes a modern and user-friendly user interface for organizers, officials and judges, which enables them to carry out their tasks efficiently. The CMS Result Service is based on the IFSC rules of the respective season. All competitions can be held according to the IFSC rules. IFSC rule changes are implemented by Vertical-Life free of charge.

It is possible to make individual adjustments to the rules and existing features. These are defined during the setup consultation. In the course of the consultation, a competition structure is also worked out, which enables the association to create meaningful rankings and a uniform evaluation of its athletes.

Project Management:

In order to guarantee a time- and cost-efficient implementation of the project, the national federation has to appoint a contact person who is responsible for the communication with VL and the internal project management of the national federation.

Consultation:

In order to offer the national federation the best possible and individually tailored service, it is necessary to agree on the structure of the competition calendar and possible adjustments to the rules and formats of the national federation. This advice ensures the smooth running of the competition season.

Project Overview and Pricing

Software Fees and Setup	Price
1. One Time Consultation, Setup and Introduction Fee	€ 2.500
2. Yearly License Fee	€ 3.000
3. Additional Fee per Event	€ 50
